Our polished & smooth surface barbells are manufactured with either 90° or 45° legs. Standard leg length is $\frac{3}{16}$ ", however, any leg length can be requested.

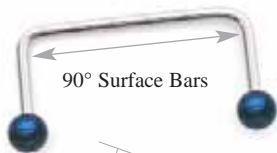

Gauges: 14, 12 & 10g

Lengths: Please specify shaft & leg length.

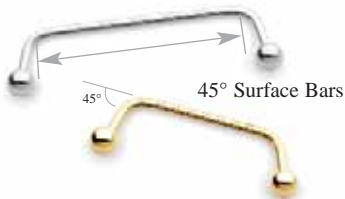

Materials: 316LVM Surgical Steel

6Al-4V-Eli Titanium

14k & 18k Yellow or White Gold

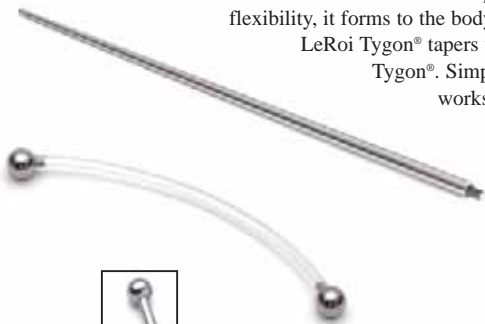

Internal/External

Tygon®

Tygon® is flexible plastic tubing that is commonly used in the medical field. It is completely bio-compatible and with its flexibility, it forms to the body comfortably. We recommend using

LeRoi Tygon® tapers when doing surface piercings with Tygon®. Simply thread the taper into the Tygon® and it works like a needle and thread. The threaded taper ensures a secure connection to the tubing.

Internal

Note: Tygon® will only accept internally threaded replacement ends. Replacement ends are sold separately.

Gauges: 14g (.020") & 12g (.030")
(are approximate sizes)

Lengths: Sold by the foot

L - Curve

Also known as J-Bars or J-Curves... This piece of jewelry is specifically designed for the navel. LeRoi L-Curves are a slight variation to the standard navel curve and fit comfortably in the navel.

Gauges: 16, 14 & 12g
Lengths: 1/4", 5/16", 3/8", 7/16", 1/2"
